

Individual Project – Use Case

Raunip Patel

CS 321 Fall 2022

- I will have the same uses case as the book besides I am adding the forward messages Log in Use case. So in a way it will be a variation of Log In. Since this is the only part I will modify, I am not adding any other use cases from the book.

Use Case: Forward the message

1. The mailbox owner carries out Log in.
2. The mailbox owner selects the “listen your messages” menu option.
3. The voice mail system plays the message menu:
 - Enter 1 to listen to the current message.
 - Enter 2 to save the current message.
 - Enter 3 to delete the current message.
 - Enter 4 to return to the mailbox menu.
 - Enter 5 to forward the message
4. The mailbox owner selects the “forward the message” menu option.
5. The voice mail system plays the forward message menu to make comfirm user choice.
 - Enter 1 to forward the message.
 - Enter 2 to return to the mailbox menu.
6. The mailbox owner selects the forward the message.
7. The voice mail system plays the menu.
 - Enter the mailbox number to forward the current message.
8. The user enters the mailbox number
9. User hangs up.

10. Start again from step 3.

Variation #1 : return to the main menu

1. Start at step 5
2. User selects the option to return to main menu
3. User is taken back to the step 3 of forward message use case.
